

Cyber Awareness & Resilience eLearning

Make your people your most effective
defence against cyber-attacks

WELCOME TO OUR ACCESS CYBER AWARENESS & RESILIENCE PACKAGE

Information lies at the heart of every successful organisation and ensuring your information remains secure from cyber-attacks is a critical priority.

Cyber data security is widely recognised as one of the largest and rapidly growing threats facing organisations around the globe. Yet it is estimated upwards of 90% of successful cyber-attacks continue to succeed because of human error. This tells us your cyber security is only as good as the attitudes, behaviors and knowledge of your people, they are your greatest defence against attack.

“ Upwards of 90% of successful cyber-attacks continue to succeed because of human error ”

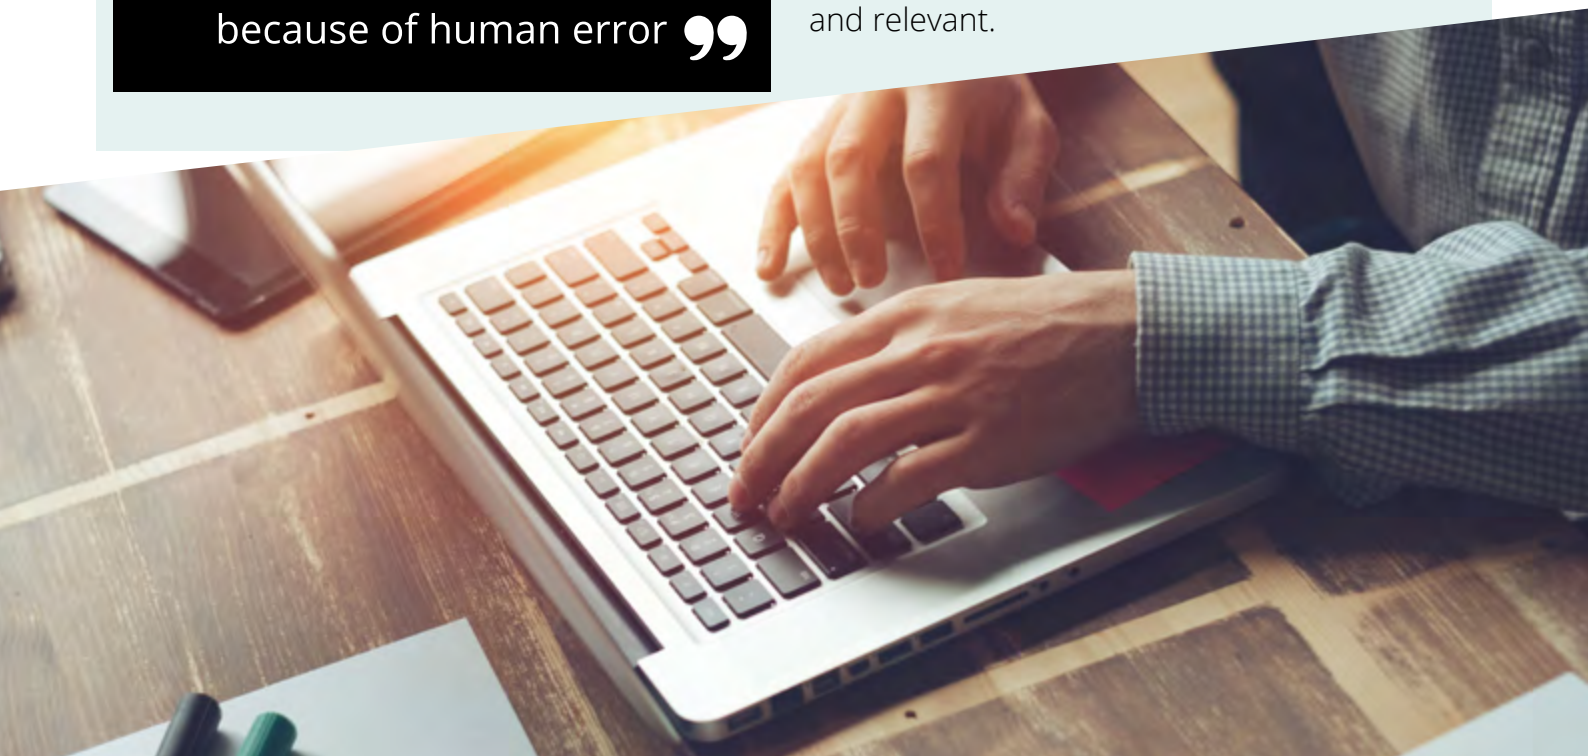

Written and designed by cyber security experts and learning specialists, our content helps your employees to become your greatest information security asset by embedding and sustaining cyber resilient behaviors and knowledge. From large-scale corporations and SMEs to public bodies, our content is helping to deliver information security and cyber resilience for organisations like yours.

Certified Training

in association with
**National Cyber
Security Centre**

Our Cyber Awareness & Resilience training provides a mix of learning formats, including eLearning, games and animations, videos and supporting PDFs which allow any organisation to design compelling training campaigns which appeal to all learning styles. The content is continually reviewed and developed to ensure the materials and techniques used remain up-to-date and relevant.
