# Cyber Awareness and Resilience

Make your people your most effective defence  
against cyber-attacks

Our catalogue of **Cyber Awareness & Resilience learning** is designed to meet the needs and expectations of modern learners through short, meaningful interactions.

All activities adapt seamlessly between mobile and desktop, and can be completed on almost any device, giving the learner access to content whenever and wherever they need it. Each activity includes video learning with cyber industry experts. We use video to get the message to the learner in a quicker and more concise way. Video delivers the message 60,000 times faster than text.

Our catalogue is fully accessible, adhering to as many WCAG standards as possible. Learners can choose from over 100 languages using the inbuilt translation tool powered by Google Translate.

**Video delivers the message  
60,000 times faster than text.**

### Phishing

Learn how cybercriminals use social engineering to get hold of personal information and how you can spot, report and prevent it.

### Passwords & authentication

Learn about the techniques and technology that can help keep your data safe.

### Handling data

Learn about how the Data Protection Act and GDPR aim to keep information safe and influence how you handle data.
